### TS-10 Aqueous Epoxy

## The Future Has Arrived

**Aqueous Epoxy** is an easy to use environmentally friendly epoxy coating that requires no mixing—and really performs which is why it ranks a ten! Is it a latex epoxy blend? Heck-No! it's far more than that. It is a true mono-epoxy coating utilizing the latest in coatings technology.

This advanced formula features specifically formulated components that protect, prevent rust, resist cracking, peeling, chipping and chalking making it excellent for use on machinery, equipment, decks, trim, marine surfaces, docks, kitchens, schools, institutions and homes—almost anywhere!

It's a brush-able mono-epoxy that levels beautifully to a smooth finish. Acceptable for use in high traffic, hard use areas and where and there is standing water. It provides a high level of corrosion, chemical and impact resistance unequalled in typical water based paint. Acceptable for use on interior and exterior floor areas, steps and railings.

The finish is fast drying, low odor, and produces a nontoxic film. Practical coverage is 300 square feet per gallon. Thins and washes up easily with water. Apply using brush, roller or spray. Dry to the touch in one hour. Available semi-gloss. Available in quart, gallon or five gallon containers.

#### Product Features:

- Produces an exceptionally smooth water resistant film.
- Provides a hard finish impact and scuff resistant finish.
- Provides superior adhesion.
- Brush & Roll up to 300 sq ft / spray up to 350 sq ft per gallon.
- Self leveling formula brushes out beautifully.
- Allows low temperature applications down to 35F.
- Lead free low odor formula.
- Available in 100 colors.
