TS-4985 Ever-Last EXP

Create A Floor - Fast!

Ever-Last EXP is a fast drying self-priming base coating that really makes things happen *fast!* It is well-liked because it creates an acid etching bond to virtually any surface it is applied to eliminating the need for primer. It covers in just one coat and is dry enough to walk on in just one hour. It is fast, highly effective, economical to use and easy to apply.

Choose Ever-Last EXP when you need a self priming high build barrier coating quickly. It is acceptable for use over a wide variety of substrates including concrete, masonry, tile, vinyl, linoleum, wood, metal and fiberglass. It is approved for direct to metal applications including steel, iron even aluminum! It is flexible enough to be applied over vinyl sheet goods.

EXP is a miracle worker because it eliminates the need for primer keeping costs down. The high build high hide finish is dry enough to walk on and over coat in under two hours speeding up projects and making you money. It excels in restaurant and institutional applications where shut-down opportunities are limited. Use it in garage floor or basement applications when time is at a premium.

With EXP the bond is guaranteed on virtually ANY surface in most cases without sanding, grinding or blasting when properly applied. Just clean with TS-695 Etching Cleaner, allow it to dry thoroughly and roll it on. Contractors and Do-It-Yourselfers love it because they can complete a two car garage in less than 4 hours and that includes applying a clear topcoating over it!

EXP is acceptable for use in interior and exterior applications. Urethane and lacquer finish coats may be applied directly over it without the worry of lifting or wrinkling. Acceptable for use as a self priming color coat for any Top Secret clear coatings in industrial floor coating applications, commercial venues or garage floor coating applications.
