TS-900 Fabrication Primer

Grey and White

TS-900 Fabrication Primer is a highly versatile, hi-performance rust preventative fabrication primer for use with ferrous and non ferrous metal and galvanized surfaces. TS Fabrication Primer is a premium-grade, high solid, low VOC coating that inhibits rust, is resistant to salt spray and penetrates cracks around light rust and mill scale. It protects corners and edges and resists exposure to the damaging effects of weather.

Intended for use as a primer coat for properly prepared surfaces. Use on interior or exterior structural steel and under most any paint. Excellent for shop equipment, tanks, metal structures of all kinds, doors and handrails.

Color: White or Grey. Finish is low sheen. Solvent: TS 101 Thinner. Clean spills and tools immediately with either TS 101 thinner or mineral spirits. Coverage is approximately 350 – 400 square feet per gallon, depending on the texture and porosity of the surface. Dries to the touch in four hours. Recoat in 8 hours. Apply by brush, roller or spray. Available in quart, gallon or five gallon cans.

PRODUCT FEATURES

- An Etching Primer
- Excellent For Nonporous Substrates
- High Solid Content Formula
- High Build, Sandable Formula
- Superior Adhesion, One Coat Coverage
- Prevents Chipping, Cracking & Peeling
- Seals & Protects
- Easy Application
- Fast Drying, Cures Quickly
- Allows Low Temperature Application
- Economical To Use
- Acceptable for Indoor/Outdoor Use
- Wide Variety Of Application Possibilities
